Tolle Idee - gute Umsetzung. Das ist auch ergreifend. Yaeh Einstein was right!0 von 1 Kunden fanden die folgende Rezension hilfreich. "Hard" science fiction? I don't think soVon Asterios KechagiasYou get better science in Ringworld, even with all the impossible

characters (you get better fiction as well). The story here is not really interesting, the characters are annoying (since when is a jarhead a better scientist and psychologist than the so-called experts?) and the attempt at portraying their inner struggles juvenile. The novel itself is not badly written, but as I've said, it fails miserably at both the science and the fiction. Cannot recommend it to anyone. 6 von 8 Kunden fanden die folgende Rezension hilfreich. Zu den Sternen und durch die Sterne bis zum Rand und zurück Von Rolf Schwemmer Dies ist eine spannende Geschichte über einen notgedrungenen immer schneller werdenden Flug durchs All bei dem die Reisenden nur "relativ" altern während das umgebende Universum sich "relativ" immer schneller entwickelt. Die Reisenden verlassen samt ihrer Menschlichkeit die Bugwelle des Urknalls, um letztendlich Zeugen einer neuen Kontraktion und eines neuen Urknalls zu werden und finden eine neue Heimat in der neu entwickelnden Welt. Ob das Universum tatsächlich eines Tages wieder kollabiert ist zwar in der Wissenschaft noch lange nicht ausdiskutiert, doch ist dem Autor eine packende Darstellung gelungen die aus meiner Sicht auch ihren wissenschaftlichen Reiz beinhaltet.

Kurzbeschreibung The epic voyage of the spacecraft Leonora Christine will take her and her fifty-strong crew to a planet some thirty light-years distant. But, because the ship will accelerate to close to the speed of light, for those on board subjective time will slow and the journey will be of only a few years' duration. Then a buffeting by an interstellar dustcloud changes everything. The ship's deceleration system is damaged irreparably and soon she is gaining velocity. When she attains light-speed, tau zero itself, the disparity between ship-time and external time becomes almost impossibly great. Eons and galaxies hurtle by, and the crew of the Leonora Christine speeds into the unknown. **Werbetext** 'The ultimate hard science fiction novel' James Blish **Kurzbeschreibung** The epic voyage of the spacecraft Leonora Christine will take her and her fifty-strong crew to a planet some thirty light-years distant.
