Discussions of the authors dyslexia miss the pointVon CustomerI am sorry for anyone that has criticized the authors dyslexia but I really cannot see what their point is. In fact I never noticed any dyslexia whilst reading - I only found it mentioned when I read the authors "about me" just now. Who cares. It certainly doesn't influence the quality of reading. What is more important is the authors ability to tell a story which is unfortunately more of a hindrance to enjoying the book. There is no connection - solutions to problems are presented as facts as soon as the problem turns up. Opponents to the main character are displayed as insane without any reason for their behavior or explanation for reaching such positions of power. At the end the only thing I liked about the story was the basic idea of an intelligent ship turning up without belligerent intentions. The actual story disappointed in delivery.1 von 2 Kunden fanden die folgende Rezension hilfreich. Aliens but with a nice changeVon Ralph von VignauThis story is a nice change to the bad aliens. Also the aliens are AI's. Very nicely built up story with several issues coming from earth powers for a change. very enjoyable reading.

KurzbeschreibungPursued across the great barrier, two self-aware ships and their crews escape with their lives from marauding pirates; but the neutrons from our solar system are deadly to the crews and the ships are soon left desolate and alone. On hearing a distant signal they follow it to Earth.On Earth young Steven Gordon, a child protegee, is nearly killed in a horrific crash. After being told he will remain in a vegetative state for the rest of his life, his family witness true courage as Steven battles his way back from the brink. Years later he takes up a job with a lifelong friend as a night security guard, but gone is the genius that was the boy. The stage is now set for a miracle and an adventure of a lifetime. Join Steven as he reaches for the sky.KurzbeschreibungPursued across the great barrier, two self-aware ships and their crews escape with their lives from marauding pirates; but the neutrons from our solar system are deadly to the crews and the ships are soon left desolate and alone. Join Steven as he reaches for the sky.ber den Autor und weitere MitwirkendeJames Murison was brought up in the North East of Scotland and is the son of a farm laborer. At the age of fifteen, a month before his sixteenth birthday, he joined the British Army as a boy soldier. After serving seven years in the regular army he left and did a farther five years in the territorials. He has turned his hands to many things over the years in the pursuit of work. He began his civilian career by driving a chippy van, moved on to working in an explosives factory and from there the jobs became many and varied. He has worked as a laborer on building-sites, on the roads, in peat bogs, in hotels as waiter and kitchen porter. He had driven removal vans and was a porter in Edinburgh. He has driven Taxis and picked tatties. At this moment in time he is studying for a degree in software development as well as writing. He began writing in the late 90's and had completed fifteen novels before deciding to try and publish them. His reluctance to publish was due mainly because of his dyslexia. He knew without doubt he would be slated for it and was proved right. To this day the only negative comments made about his writing is due to his dyslexia. One day he hopes to take his work to a mainstream publisher where this problem will be a thing of the past. However he believes this path, though a lot tougher, will help him in the long run, overcome some of his disability. J W Murison is a character writer and his many jobs throughout his working life has ensured a rich variety of ingredients to choose from while baking up a new character. The main characters in his novels are normally Scottish even though the books are not always set in Scotland.
