Historical paranormal romanceVon Helen HancoxAlthough the spine of this book labels it a 'Historical Romance' it

actually has a considerable dollop of paranormal woven through the pages. Merrick Mac Lochlainn has to travel through time to protect his people from a great evil. His journey is from the Isle of Coruain in the year 981 to 19th century England where he seeks a special stone, one of two that exist somewhere in England, with just the prediction that he needs to find 'Keating' on the Carlisle Road. As Merrick arrives on the Carlisle Road he sees a woman being attacked by four men and wades in to help, knowing that he can't use his usual magic in this situation as it will alert his enemies as to his location. Jenny Keating, the young woman the mysterious man helps, has her own secrets. She's recently left a school where her treatment had been decidedly Jane Eyre-esque with beatings from the Reverend Usher, the Headmaster. Her one item of value, a special pendant left to her by her parents, has been stolen and she's on the train of her erstwhile roommate Harriet whose brother apparently lives in Carlisle. Jenny decides to travel to Carlisle to find the pendant before taking up her new position as governess just north of Carlisle. Her strange abilities to affect objects when she feels emotions strongly have made her keep herself to herself - along with the fact that everyone she has ever trusted has left her. When the man who helped Jenny against the assailants wakes up from a crack on the head he has amnesia. Jenny names him Matthew and says he is her husband so that a band of Gypsies will help them. But Merrick remembers nothing of his mission and believes that he is Jenny's husband. As the band travels slowly towards Carlisle Jenny finds herself getting more and more attached to Matthew but she fears that a man such as he must have a wife whom he will remember. The story moves on as they hunt for the pendant, Merrick's memory returns and Jenny and he realise that they have no future. But is there more to Jenny than meets the eye and are the prophecies about Merrick's future wife misleading? This was an enjoyable book with some interesting settings with the band of Gypsies and moving around Carlisle in the search for the pendant. Jenny and Merrick were both believable and likeable characters although Reverend Usher seemed rather a pantomime villain. The paranormal aspect of this story felt sometimes a little of a distraction and the short scenes back in Coruain were, for this reader at least, rather spurious. However it was a good read overall.
