Von Catherine Asaro : The Phoenix Code (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Phoenix Code (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. Romantic SciFiVon amaterasuIf you like Asaro's other Skolian Novels, you'll like this as well.It's not so much Sci-Fi as some of her other books in the series, but she's still showing a strong understanding of physics.The Skolian Novels are in fact the first ROMANTIC science-fiction books I ever read - and I do have to admit that I rather like them. Probably because throughout all romanticism you still feel that Asaro builds a reasonable, rational world.0 von 1 Kunden fanden die folgende Rezension hilfreich. ein Thema ,das irgendwann einmal aktuell werden kannVon uli

Ulrich Frau Asaro behandelt in all ihren Romanen zwischenmenschliche Beziehungen unter zukunftsvisionären Aspekten, im Phoenix Code ist der Mensch nicht mehr aus "Fleisch und Blut", sondern eine "Maschine". Wo hrt jetzt der Mensch auf und wo beginnt die Maschine, ein interessantes Thema

Kurzbeschreibung Megan O'Flannery, an expert in robotics and Artificial Intelligence, is hired by a secret military-funded project that has created four self-aware androids. Only one of these androids has survived, and Megan finds herself in danger almost immediately, as she begins her work with the remaining android. Ander, as this android now calls himself, has the capabilities of a high-speed computer, superhuman reflexes and strength, the looks of an Adonis, and behaves like an angry, unpredictable adolescent. When an internationally renowned robotics genius, Raj Sundaram, is also hired for this project, Megan finds herself attracted to him but afraid that Raj may have a deadly agenda of his own. Added to her troubles is Ander's fierce animosity towards Raj. Kidnappings and pursuits by mercenaries ensue, and all three -- Ander, Megan, the mysterious Raj -- must fight for their survival, while Megan struggles to comprehend the nature and motives of her strange companions. A fast-paced thriller of robotics and love by the Nebula-Award-winning author of the highly acclaimed Skolian Empire/Ruby Dynasty series, five fantasy novels, and four sf thrillers, including THE PHOENIX CODE. Catherine Asaro earned her Ph.D. in Chemical Physics and MA in Physics from Harvard and has done research at the University of Toronto, the Max Planck Institut für Astrophysik in Germany and the Harvard-Smithsonian Center for Astrophysics. She has taught classical ballet and founded the jazz dance program at Harvard. on THE PHOENIX CODE: "Sound characterization, straightforward plotting, abundant world building detail, and almost as much humor." - Booklist "A very fine blend of mystery, adventure and scientific experimentation" - Science Fiction Chronicle on Catherine Asaro: "Thoughtful and imaginative..." - Diana Gabaldon "Physicist Asaro combines hard speculative science and first-rate storytelling." - Booklist "Spectacular science." - Kirkus s "Readers seeking the harmonious meld of hard SF's rigor and human chemistry's heat should read Catherine Asaro's fiction." - SciFi Weekly "Asaro's portrait of interstellar intrigue, weird socio-political customs and galactic history has come to approach the neighborhood of such classics as Frank Herbert's DUNE series." - SciFi.com on the Skolian Empire series: "One of the major series in the genre." - SF Chronicle "Asaro's Skolian saga is now nearly as long and in many ways as compelling as DUNE, if not more so." - Booklist "Catherine Asaro brings the feel of science back into science fiction." - Donald M. Kingsbury, author of COURTSHIP RITE and PSYCHOHISTORICAL CRISES. "Known for her brilliance at combining science, adventure and riveting characterization, Catherine Asaro breaks new territory..." - Mary Jo Putney, New York Times bestselling author of THE WILD CHILD and THE RAKE about the author: Catherine Asaro is a Nebula Award winner for her novel The Quantum Rose, part of her popular Skolian Empire series, and the novella The Spacetime Pool. Her novels have three times been named the best science fiction novel of the year by Romantic Times Book Club. She has won numerous other awards, including the Analog Readers Poll award, the Homer, and the Sapphire award. She has an M.A. in physics, and a Ph.D. in chemical physics, both from Harvard, and has done research at the University of Toronto, The Max Planck Institute, and the Harvard-Smithsonian Center for Astrophysics. A former ballet and jazz dancer, she founded the Mainly Jazz Dance program at Harvard and danced on both the west and east coasts. Her near future thrillers include the novels Alpha, Sunrise Alley, The Phoenix Code, and The Veiled Web. Her most recent Ruby Dynasty books are The Ruby Dice, Diamond Star, and Carnelians.. For Diamond Star, she also cut a CD of the same name with the rock band Point Valid, which offers a soundtrack to the book. Visit her facebook page: www.facebook.com/Pressestimmen Also by Catherine Asaro The Veiled Web "Thoughtful and imaginative... A near-future layering of East and West... and of love and its loss--all woven into an intriguing tapestry." --Diana Gabaldon "Known for her brilliance at combining science, adventure, and riveting characterization, Catherine Asaro breaks new territory with a compelling story set in the world we know, at the dangerous intersection of cutting-edge technology and the age-old conflict of culture and the human heart. A romance of ideas as well as the story of a man and a woman attempting to build a bridge between two very different societies, The Veiled Web is a thought-provoking and entertaining tale for the dawn of a new millennium." -- Mary Jo Putney, New York Times bestselling author of The Wild Child Available from Bantam Books From the Paperback edition. Kurzbeschreibung Megan O'Flannery, an expert in robotics and Artificial Intelligence, is hired by a secret military-funded project that has created four self-aware androids.
