Von Anina Eine Gromutter wartet auf den Besuch der Enkel und findet sich im nächsten Moment auf einem fremden Stern und in einem jungen Körper wieder. Alles was ihr vertraut war, ist vorbei. Eine neue Welt, neue Sprache, neue Denkweisen, - Männer, die sich aus verschiedenen Gründen für sie interessieren. Mu man lesen, schon wegen dem stattfindenden Wissenstransfer zwischen der Terranerin und den "Aliens"- endlich mal waren meine Mathe-kenntnisse nicht defizitär.

Kurzbeschreibung Enemies, Fate or Survival One Woman holds the Key The new Science Fiction Adventure Romance series by Wendy C Giffen reveals a genetic link with inhabitants of other worlds Salt Spring Island, B.C., June 3, 2015 -- long ago a dying star sent humans fleeing across the galaxy. Separated and alone, they discover a gamut of life forms and experiences before they find various places to survive. But not for long: On the planet of Selene, an escaped human science experiment, Rowhan, only wants to survive. To do that she needs to prove she's vital to saving the planet from an enemy within and an enemy from space, and is not the abomination the ruthless hunters believe her to be. That is, until a man in need, who over comes her fears and makes her feel like no other, threatens to make her risk it all, and that could change the future - forever. I love the thought of what would happen if? Life is so full of adventure, romance, heroism and sheer awesomeness if you just stay aware and in the now, but for most of us its easier to imagine it as somewhere else, said author Wendy C Giffen. I delight in the romance of life and wanted to write a book about what might happen if a person was plucked out of one life and plunged into unknown adventures. I had a lot of fun writing it, so much in fact, that I decided to write some more. The Selene Experiment is the first in a series. (SHB Publishing House, Inc, June 2015.) Giffen, a graduate from Cambridge, has also studied and practiced energetic healing and the use of intuitive abilities. She founded a hypnosis clinic where she used her own experiences to reassure parents of intuitive children and their children, that there was nothing wrong with them. In the Selene Series, this knowledge has been brought to bear and as the series progresses more psychic elements emerge revealing our relationship with this innate ability. The Selene Experiment was written to delight and entertain, and to that end the author is putting aside her mysteries and romances to get the next two in the series out in this year and in 2016. Wendy C Giffen is an erstwhile teacher, potter and home schooling mother of six. She is the author of several books, some of which were victims of computer crashes, others to moving house, but the remaining few are intended to be published in 2016. ber den Autor und weitere Mitwirkende Wendy C. Giffen is an unrepentant lover of life, an author, certified hypnotist, erstwhile potter and teacher. Although born on the autumn equinox, which suggests balance, her life has been anything but boring. Perhaps that's why no matter what country she is living in writing is a constant in her life. Having tried to settle, with occasional successes, she now just goes with the flow. Amongst other adventures she trained as a teacher at Cambridge, designed and built a house, owned and ran a hypnotherapy clinic, farmed, potted, home schooled ... and had several children. During all that she wrote. Her children groan at her puns and her husband sighs at her housekeeping - when he notices which is rare. She loves to kayak or sail around the islands, to drive a horse and buggy, and to bike. She loves dawns, enjoys witty fridge magnets, reluctantly goes to the gym, and happily takes four dogs for numerous country walks.
